EXPERIENCE

Interview Kickstart   Bangalore, India(Remote)
SDE I   *Oct 2024 – Present*
- Contributed to the Resume Analyzer project, which **generated $90,000+ in revenue**, with current scaling efforts aimed at $1 million.
- Built Expert Insights and Lead AI components for resume analysis in HubSpot, helping Program Advisors **increase lead conversions from 3% to 6%**.
- Implemented **Role-Based Access Control** (RBAC) system across internal tools, improving platform security and user permission management.
- Developed a payment solution for US bank accounts using Stripe integrated with Plaid, **reducing transaction costs by 40%**.

Taksh Education   Delhi, India(Remote)
Full Stack Engineer   *Dec 2023 – Jan 2024, Intern*
- Integrated AWS SNS with their application, reducing cost by 94.12%.
- Implemented AWS IVS for live streaming enhancing the company's video delivery.
- Implemented single-device login restriction for the app to ensure that only one student can access the course at any given time, thus restricting simultaneous logins from multiple devices.

PROJECTS

Code Editor| *GitHub*, *Link*
- I have developed an online code editor leveraging the power of the **MERN**, **TailwindCSS**, **Redux** .
- The project incorporates a compilex library, and **Prisma** as ORM enhancing its functionality by allowing users to compile and run code within the editor itself.

MCOE Canteen | *GitHub*, *Link*
- Developed a canteen management app using **PHP**, **MySQL**, **JavaScript**, **HTML and CSS** enabling students to place food orders, and providing an admin panel for the canteen owner to view and manage incoming orders.
- Implemented a user-friendly interface for students to browse menus, select items, and place orders, while the admin side features real-time order tracking and management capabilities, streamlining the canteen operations.

Teachyast | *GitHub*, *Link*
- Empower instructors to create courses with **React**, **Node.js**, **Prisma**, and **AWS S3**. Students purchase via **Razorpay**, accessing lectures stored on AWS S3.
- Separate panels for **Instructors** and **Students** ensure efficient management and learning. Revolutionizing education with seamless technology integration.

Portfolio Builder | *GitHub*, *Link*
- Built with **React**, **Node** and **AWS S3**, this app introduces a vibrant space for users to share portfolios through projects and blogs.
- It allows effortless resume uploading and instant updates Backend deployed at **AWS Lambda**.

SKILLS
